Summary

Fullstack Developer with 6+ years of experience building web applications end-to-end, from business process analysis and ERD design to API development and deployment. Delivered systems for banking, healthcare, manufacturing, and energy clients, including core banking integrations, approval workflows, procurement platforms, and reporting dashboards. Skilled in Laravel, FastAPI, .NET, and modern JavaScript frameworks, with experience leading projects from client discovery through delivery.

Skills

- **Programming Languages:** PHP, Python, JavaScript, C#
- **Frameworks & Libraries:** Laravel, FastAPI, .NET Core, .NET Framework MVC, Next.js, React, jQuery, Tailwind CSS, Bootstrap
- **Databases:** PostgreSQL, MySQL, SQL Server
- **Tools:** Docker, Git
- **Core Competencies:** System Analysis, ERD & Database Design, REST API Development, Core Banking Integration, Approval Workflow Design, Query & Dashboard Optimization, Requirements Gathering, Project Coordination

Work Experience

Software Engineer

PT Astra Daihatsu Motor | Jakarta, Indonesia | Dec 2024 – Dec 2025

- Built ADM's internal procurement system as part of a team, consolidating RSS (Request for Selection Supplier), RFQ (Request for Quotation), and SSP modules from several separate applications into a single web platform.
- Simplified the supplier bidding process end-to-end, making it easier for suppliers to submit and manage quotations.

Full Stack Developer

PT Solusi Senyum Indonesia (KLAR Smile) | Jakarta, Indonesia | Jun 2023 – Aug 2024

- Built the Treatment Notification Update feature, reducing dentist notification delays and speeding up treatment confirmations by around 25%.
- Developed a Sales Dashboard that automated Sell In and Sell Out reporting, improving data transparency and reducing manual errors.
- Fixed bugs on the internal platform to improve overall system stability.

Backend Developer

PT Ihsan Solusi Informatika | Bandung, Indonesia | Jan 2019 – Jun 2023

- **UNIFE (PT Pos Indonesia):** Led the project from the ground up, designed the ERD, selected FastAPI and React as the stack, and worked directly with the client from kickoff through module change requests.
- **UNIFE (PT Pos Indonesia):** Built APIs integrating Pospay and Wesell with the core banking system.
- **IFOS (Bank Jabar Syariah):** Took over backend development and re-analyzed the existing ERD.
- **IFOS (Bank Jabar Syariah):** Simplified the expense submission approval flow from 12 steps to 8 while keeping full integration with the core banking system.
- **Saku Emas (Bank Syariah Mandiri):** Designed the ERD from scratch and built the platform using Laravel.
- **Saku Emas (Bank Syariah Mandiri):** Led integration discussions with Antam for gold price, stock, and product data, and coordinated team timelines and task assignments.

Backend Developer (Freelance)

PT Sigma Cipta Utama | Jakarta, Indonesia | Apr 2021 – Mar 2022

- **SPIIRIT v2 (Pertamina):** Built workflow states for approval, revision, and rejection processes using .NET Framework MVC, alongside a full-time role.
- Optimized dashboard data handling to improve performance and user experience.

Full Stack Developer

PT BIA Energi | Bandung, Indonesia | Jan 2018 – Nov 2018

- **SPIRIT (Pertamina):** Assisted the Project Manager in designing the ERD for the original SPIRIT project.

- Built a budget drawdown feature using .NET Framework MVC to generate cost estimates per work timeline, keeping proposals within budget constraints.
- Optimized dashboard queries, cutting data processing time from 8 minutes to 1.5 minutes.

Education

Universitas Komputer Indonesia | Bandung, Indonesia | 2013 – 2017

Bachelor's Degree, Informatics Engineering
